

Alaska Science Catalog

Welcome to the Alaska Science Catalog:

Your one-stop portal for the discovery, distribution and visualization of scientific and spatial data for Alaska.

- Download Geospatial Data
- Browse Documents and Publications
- Explore Interactive Maps
- Contribute Data to Catalog
- Share News with the Community

Learn More About ASC:

The Alaska Science Catalog (ASC) is sponsored by the University of Alaska EPSCoR program and is being developed by the University of Alaska-Geographic Information Network of Alaska (GINA). ASC is a collaborative effort that includes participation of University of Alaska campuses in Fairbanks, Anchorage and Juneau as well as local, State, and Federal agencies, NGO's, and many others.

The Alaska Science Catalog ties together records from each of these individual Catalogs and serves as a "one" stop location to search for scientific and geospatial data, reports, maps, documents, and projects within the entire Catalog system.

An additional goal of ASC is to compile important statewide data. The administrators of the ASC portals, are continually adding new research and data

to the ASC. The administrators are continuing to collect research projects and data records for the database.

The goal of Catalog is to avoid duplication of effort. Not all data are stored on Catalog. ASC links users to sites where appropriate public access and stewardship of data are already provided. However ASC can provide data management support where access or stewardship resources are required.

The end result is a compilation that allows for the appropriate discovery and efficient distribution of scientific data products.

Want to add your scientific research into the Alaska Science Catalog? It's Simple and Straightforward! Please contact one of the site administrators for more Information on how to link your important research and publications

Alaska Science Catalog - Member Catalogs

ASC is based on a distributed system of Catalog implementations that provides support for specific groups of users.

Member Catalogs include:

- * North Slope Science Initiative,
- * Alaska EPSCoR,

- * Alaska Energy Authority,
- * Arctic LCC,
- * Southeast GIS Library,
- * Southcentral, Southeast and Northern Test Case-Alaska Science Catalog,
- * Alaska Coastal Rainforest Center,

- * Geographic Information Network of Alaska.
- * US Bureau of Ocean Energy and Management
